

StaticSmart™

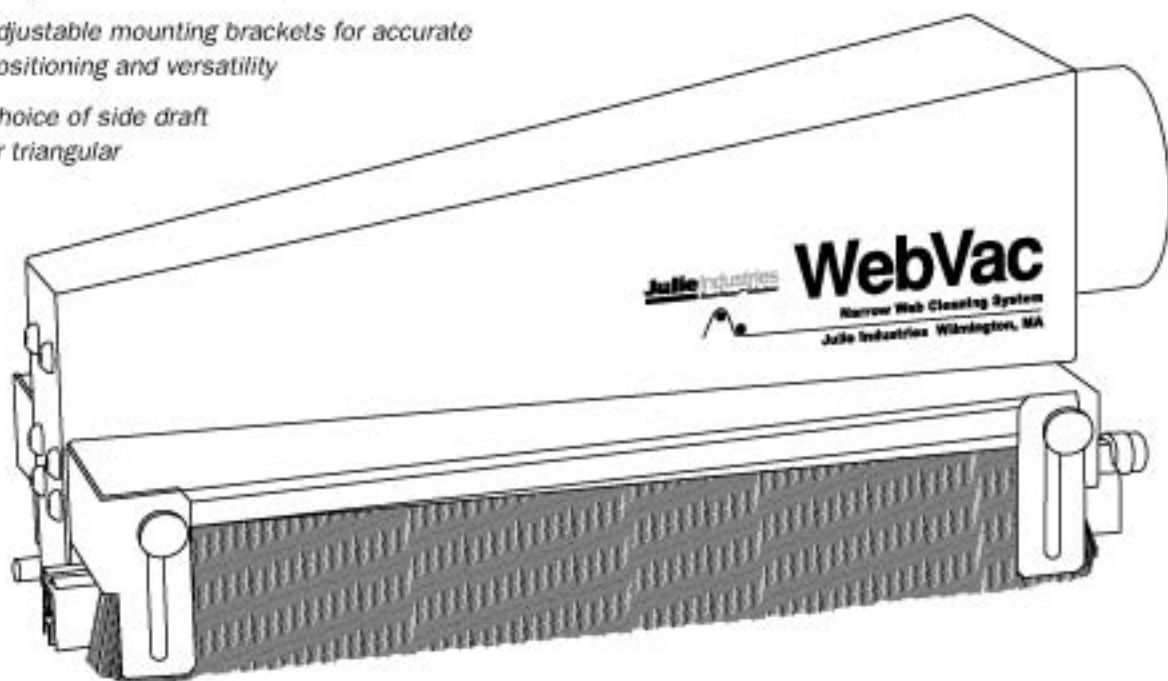

WebVac Narrow Web Cleaning System

The WebVac Narrow Web Cleaning System from Julie Industries is a continuous-duty cleaning system designed to provide either contact or non-contact cleaning of narrow webs in a wide variety of critical applications. It will enable you to simultaneously improve the quality of your product and increase profits by reducing rejects. In a single package, the

WebVac combines three proven cleaning technologies: powerful vacuum, static neutralization, and compressed air blow-off to remove dry contaminants from narrow webs quickly and efficiently, even at web speeds up to 2000 feet per minute! Once removed, the WebVac captures and collects the contaminants for safe and easy disposal.

WebVac benefits:

- Removes contaminants and neutralizes static electricity in one step—reduces waste and increases profits!
- Compact design for installation in confined spaces
- Quiet operation, less than 70dbA at 2 feet
- Rugged, all-metal construction for durability
- Low maintenance, no operator intervention required
- Designed for continuous operation
- Adjustable mounting brackets for accurate positioning and versatility
- Choice of side draft or triangular
- Choice of contact or non-contact cleaning
- Affordable and economical
- Loosens, lifts and captures contaminants for thorough cleaning and reduced recontamination of the web
- Easy to install and easy to operate
- Tapered hood design for even suction across the web.
