### **BUILDING FUTURES ONE STUDENT AT A TIME**

Many people emerging from the educational system do so without arriving at a desire in a specific field. Since 1982, the owners of **NORTHEAST TECHNICAL INSTITUTE (NTI)** have helped thousands of people build their future – one student at a time. You can train in just weeks or months – not years, so you can earn your national certification and start your new career fast! NTI's flexible schedules, career-focused training & extensive career support services allow their students to achieve their goals.

NTI provides dynamic and innovative hands-on training for today's hottest careers, including healthcare (medical assistant, pharmacy tech, office support), CDL training, bartending, computers & IT, and HVAC & Green Technology. Their staff would be happy to meet with you and explain the opportunities in these fields and how their programs can get you started towards these rewarding careers. Should you get accepted and enroll, you'll receive full information on tuition financing if you qualify. If you are still looking for the right career, contact NTI and take the time to make an educated choice.
