Tevron® Solutions Fully Support all Epic Applications (www.epic.com).

CitraTest, CitraTest VU, and CitraTest APM are the only single license, integrated solutions for conducting application performance monitoring, functional, regression and latency testing for every enterprise application that is accessible from a Windows based machine.

Nashua, New Hampshire, April 26, 2010 – Tevron today announced the addition of support for all Epic environments to its suite of APM & Testing solutions. Epic makes integrated software for mid-size to large medical groups and integrated healthcare organizations. One database spans clinical, access and revenue functions and extends into the home. With the latest releases of CitraTest, CitraTest APM, and CitraTest VU, Tevron again is taking the lead role in the APM & testing industry in providing support for every Epic application (EpicCare) covering Ambulatory EMR, Practice Management, Beyond your Walls, Inpatient EMR, Hospital Billing/ADT, and more. As many medical groups, hospitals, and integrated healthcare organizations move towards Epic, Tevron's APM & testing solutions will continue to offer the industry lead for application monitoring, load testing, and general automation for those critical deployments.

To learn more about Tevron's automated testing & monitoring solutions or to request additional information, please call +1.702.518.7435, email sales@tevron.com or visit http://www.tevron.com.
