CitraTest®™ 3.0, Real-Time Application Monitoring

Monitor Any Application, Anytime, Anywhere.

───

Chelmsford, Massachusetts, August 14, 2002 – Tevron, LLC today announced version 3.0 of

CitraTest®™, a revolutionary testing solution that enables organizations to test and monitor

any enterprise application.   Through the use of CitraTest®™, test engineers can now

deploy sophisticated monitoring test scripts anywhere across the global enterprise. Performance

results are automatically generated and presented real-time via user definable and

user friendly graphs and charts. In addition, performance thresholds can be defined for any business

function or business transaction, which will trigger user definable alarms via e-mail, page, etc.

"For global organizations that must monitor applications at different geographical locations

across the enterprise, CitraTest®™ delivers a powerful and comprehensive solution. Now,

the overall health of all enterprise applications anywhere in the world is reported real-time thus

allowing for the prevention of costly system failures and downtimes", explains Michael Dunlay, VP

of Professional Services at Tevron, LLC.

Tevron's automated solutions support all Windows environments including Windows 3.1,

Windows 95, 98, NT, 2000, Millennium, and XP. In addition, Tevron's automated solutions also

support ALL browsers, including AOL, Microsoft, Netscape, RealOne as well as ALL development

environments including Java, Siebel, PeopleSoft, Lotus Notes, Oracle, SAP, WebLogic,

WebSphere, .NET, Streaming Media, Citrix, to name just a few.

To learn how Tevron can improve the testing of your enterprise applications, call
