AcuTest® Version 3.0, the Industry's Most Accurate, Automated Testing Solution for Windows® Applications, Introduces New Proprietary Optical Character Recognition (OCR) Capability.

AcuTest is the only single license, integrated solution for conducting performance benchmarking and compatibility, functional, regression and latency testing across all Windows based applications, environments and browsers.

───

Chelmsford, Massachusetts, August 20, 2001 – Tevron™, LLC today announced the availability of AcuTest version 3.0 that now includes the addition of Optical Character Recognition (OCR) support, adding to its overall functional and regression testing capabilities without compromising its virtually non-invasive testing approach. This revolutionary non-invasive capability allows customers that need OCR for functional testing to realize AcuTest's benefits of improved testing accuracy, better resource utilization, lower cost, and greater customer satisfaction.

"The addition of Tevron's proprietary OCR capabilities takes us to the next level in terms of overall functional and regression testing", says Jay Labadini, Chief Executive Officer of Tevron, LLC. "Now, AcuTest has the ability to read text, evaluate text, perform calculations and click on text strings and still maintain its unmatched testing approach that does not in any way modify the operating system of the system under test (SUT). Furthermore, through Tevron's proprietary OCR algorithms, we have been able to add significant features such as intelligent font recognition and the ability of AcuTest to learn custom fonts."

AcuTest and AcuTet NI are revolutionary new automated testing solutions designed specifically for Windows enterprise users, ASPs, ISVs, and e-Businesses. Because AcuTest is virtually non-invasive

- more -

and AcuTest NI is a totally non-invasive testing solution, users are assured quality and accuracy, thereby saving money, time and resources and ensuring their ability to be competitive. AcuTest is designed specifically for testing Windows applications and is the world's only software test automation solution for conducting performance benchmarking, compatibility, functional and latency testing for all Windows development environments and all browsers through one single license.

AcuTest supports all environments, Windows 95, 98, NT, 2000, Millennium (Windows ME) and NT Terminal Server and does not in any way modify the operating system of the system under test (SUT) by requiring only one DLL. The totally non-invasive AcuTest NI tests any development environment, any application and any PC operating environment. AcuTest and AcuTest NI operate with all browsers, including AOL, Microsoft, Netscape, Lotus Notes, Java, SAP, Oracle, etc., all custom controls and is the only solution for testing applications on thin client machines..

To learn how the AcuTest and AcuTest NI automated testing tools can improve the testing of your Windows applications and to download a free evaluation copy, call 1.978.441.9844 or visit www.tevron.com.

ABOUT TEVRON, LLC

Tevron, LLC is a pioneer in a new class of automated software testing solutions. Utilizing Tevron's proprietary Image Verification as a platform for its automated solutions, Tevron's mission is to provide minimally or totally non-invasive automated testing solutions compatible with all operating systems, development environments and multiple hardware platforms. Tevron offers test automation solutions in both standalone software versions and totally non-invasive external appliance aided versions, as well as offering expert implementation and testing services.
