Tevron, LLC Releases Prewritten Microsoft Office 2000, Load Testing Scripts for its Flagship Solution, CitraTest™ VU.

CitraTest VU is the only client side load testing solution for creating real user load activity for Citrix hosted applications.

Chelmsford, Massachusetts, December 17, 2001 – Tevron, LLC today released a series of prewritten CitraTest VU Load Testing scripts for Microsoft Office 2000. Through the use of these scripts, real user workload can be quickly and easily replicated for Office 2000. User work scenarios for Word, Excel, PowerPoint, and Access can be automatically executed over numerous ICA sessions while the overall response times are closely monitored.   In addition to these predefined user scenarios, end users can also develop custom user scenarios for all other internal applications that will be a part of their mission critical Citrix rollout.

CitraTest VU simulates several virtual human users on a single NT machine without installing any software on the Citrix Metaframe Server. CitraTest VU interacts with the target application by issuing standard keyboard and mouse events directly to the Citrix hosted application from within the Citrix ICA client in accordance with user defined test script logic.

"Through the use of Tevron's prewritten user scenarios, the enterprise, ISVs and ASPs can effectively replicate real user loads before going live, allowing them to perform to service level agreements with much greater confidence.   In addition to delivering the technology to perform Citrix load testing via CitraTest VU, we have now taken that a step further by delivering the actual test scripts that will be used to generate the real user load against the Metaframe server. By delivery these predefined user scenarios, our clients will save valuable time in the script development phase of their load testing effort", explains Jay Labadini, President and CEO of

Tevron, LLC.

CitraTest VU can simulate users running Windows 3.1, Windows 95, 98, NT, 2000, XP, Millennium, and Linux. CitraTest VU operates with all browsers, including AOL, Microsoft, Netscape, etc. In fact, using only one DLL, CitraTest is so non-invasive that its accuracy is unmatched. To learn how CitraTest VU can improve the testing of your Citrix hosted application, call 1.978.441.9844 or visit www.tevron.com.

ABOUT TEVRON, LLC

Tevron, LLC is a pioneer in a new class of automated software testing solutions. Utilizing Tevron's proprietary Image Verification as a platform for its automated solutions, Tevron's mission is to provide automation solutions compatible with all operating systems, development environments and multiple hardware platforms. Tevron offers test automation solutions in both standalone software versions and totally non-invasive external appliance aided versions, as well as offering expert implementation and testing services.
