Tevron, LLC Provides Powerful Automated Testing Solution for Palm Handhelds

Tevron's enterprise testing solutions can be used prior to deployment of Palm based applications to ensure functionality, compatibility, and measure performance.

Chelmsford, Massachusetts, January 28, 2002 – Tevron, LLC today introduced support to its AcuTest® solution for testing Palm based applications via PC emulation. Through the use of Tevron's powerful automated testing solution, the overall functionality and compatibility of Palm applications can be thoroughly and accurately tested. In addition, scripts can be created that continuously monitor these applications to ensure availability and overall performance. By recording and replaying actions that simulate a person using Palm based applications, testing teams can properly validate functionality, compatibility, and accurately measure the end user experience.

"Handheld devices, such as Palm, have rapidly become an integral part of e-business and until now, have been completely ignored by the software only, automated testing vendors. Through the use of Tevron's unique image testing technology, testing teams and developers can now effectively automate the validation of all Palm applications. In addition to delivering the technology to perform functional and compatibility testing of Palm applications, Tevron's enterprise testing solution can also monitor these applications 24x7. Through the use of AcuTest®, Palm developers finally have an affordable, software based alternative to the expensive, hardware based tools to perform automated testing. For Tevron, this is yet another industry first in the automated testing space", explains Jay Labadini, President and CEO of Tevron, LLC.

To learn how Tevron can improve the testing of your Palm applications, call 1.978.441.9844 or visit www.tevron.com.

ABOUT TEVRON, LLC

Tevron, LLC is a pioneer in a new class of automated software testing solutions. Utilizing Tevron's proprietary Image Verification as a platform for its automated solutions, Tevron's mission is to provide automation solutions compatible with all operating systems, development environments and multiple hardware platforms. Tevron offers test automation solutions in both standalone software versions and totally non-invasive external appliance aided versions, as well as offering expert implementation and testing services.
