Tevron® Adds Full Support for Microsoft® Operations Manager (MOM) 2005 with its Flagship Solution, CitraTest® APM.

CitraTest APM is the only monitoring solution that fully supports every enterprise application that is accessible from a Windows based machine.

Nashua, New Hampshire, October 7, 2005 – Tevron today announced the addition of support for Microsoft Operations Manager (MOM) 2005 to its flagship End-To-End Monitoring solution, CitraTest APM. MOM delivers enterprise-class operations management to improve the efficiency of IT operations. With the latest release of CitraTest® APM, Tevron again is taking the lead role in the APM industry in providing monitoring solutions with an open architecture that allows for the easy integration with third party solutions with full support for every application that is accessible from Windows. "Through the use of CitraTest APM along with Microsoft Operations Manager, Tevron's enterprise customers will spend less time dealing with crisis issues and fighting costly fires and more time delivering efficiencies and new services to their end users," says Jay Labadini, Vice President of Business Development.
