Login

After receiving your Username and Password, click the link on our web site to get to the LogIn Screen:

The screenshot shows the Seattle World Courier Ground website. At the top left is the logo with the text "SEATTLE World Courier Ground COURIER • LOGISTICS • WAREHOUSING". To the right is a "Quick-Track" box with "OrderID" and "Track" fields. Further right is "[Login Required]". Below the logo is a navigation menu with "Main", "New Order", "Tracking", "Reports", "Address Book", "References", "My Profile", and "Admin". The main content area is titled "Online Access" and contains a "Registered Online Users" login form and a "New User?" section. The login form has fields for "User ID:" and "Password:", a "Login" button, and a "Save login info" checkbox. A link "Forgot your password?" is at the bottom of the form. The "New User?" section includes the text "Register now by calling 401-459-0990" and a list of benefits: "Easy to use **Order Entry**", "Real-time order **Tracking**", "**Reporting** tools to search for a specific order", "View or download current and past **Invoices**", "Management of **Address Book**", "Management of **References**", and "Custom preferences defined with **My Profile**". At the bottom left of the page is the copyright notice "Copyright © 2004 Key Software Systems".

Getting Started...

New Order

The New Order screen is used to place new shipments and receive quotes. This process should be simple and speedy, since the New Order screen populates fields based on your custom preferences. Convenient tools such as the Address Book and References will help make your online experience as simple or thorough as you wish. After selecting the appropriate service-type and a few other required fields, you will be ready to submit your order.

Tracking

The Tracking screen is your real-time portal to view the progress of your current orders. As soon as an order is submitted, whether by an online user or a customer service rep, the order is available for Tracking.

Reports

The Reports component will allow a user to view and print accounting-related reports such as Statement Sheets and Invoices.

Address Book

The Address Book is a convenient way to prepare your pickup and delivery locations for future use. This tool will allow the user to add, edit and/or

The Boston section of the online tour will be used to illustrate system capabilities. If you Log In from another area, you'll see that the system contains more locally relevant data.

ORDERS and PROOF of DELIVERY

The first item of interest is the **New Order** Tab. Clicking this takes you to the following screen:

COURIER • LOGISTICS • WAREHOUSING

Copyright © 2004 Key Software Systems

For the purposes of this example order, I will use previously stored addresses for **Pickup** and **Delivery**, and also enter the Delivery Contact and Phone number as the Sender. By using the pick list and calendar icons, I have also selected the Delivery Details.

Note that for Auto-notification, the email addresses for the Pickup and Recipient are automatically entered from the Address Book. By checking any or all of the boxes next to the email addresses; Submit, Pickup and Delivery; an automatic email will be sent notifying the Pickup and Recipient when the order was submitted, when the items for delivery were picked up, and when the delivery was completed. In other words, a Proof of Delivery or POD will automatically be generated by the system and sent to the parties of interest!

REPORTS

Clicking the report tab yields the screen shown on the next page:

Invoices are probably the most useful item available in the Reports section of the online system. By highlighting an invoice, you may view it on screen, or download the invoice as a PDF. Due to system and accounting restrictions, invoices cannot be processed as part of the demonstration.

The screenshot displays the World Courier Ground website interface. At the top left is the logo for "BOSTON World Courier Ground" with the tagline "COURIER • LOGISTICS • WAREHOUSING". To the right is a "Quick-Track" section with an "OrderID" input field and a "Track" button. Further right, it says "WCG Demo BOS Online Demo Account" with a "[Logout]" link. A navigation bar below the logo contains tabs for "Main", "New Order", "Tracking", "Reports" (which is highlighted), "Address Book", "References", "My Profile", and "Admin".

The "Reports" section is active, showing sub-tabs for "Invoices", "Account Info", and "General". Below these tabs, a message reads: "Select an Invoice from the list below and click **'View Invoice'** or **'Download PDF'**". A table lists one invoice:

19708-4882	Period Ending [07/15/2008]	Amount [101.98]
------------	----------------------------	-----------------

Below the table are two buttons: "View Invoice" and "Download PDF".

REFERENCES

The reference utility allows you to create, store, manage and recall client specific references that can be used when entering orders. For example, suppose that you have a client that you frequently have items delivered to, and they would like to use their own reference number to flag those deliveries.

By selecting Create New Reference from The Reference Menu, this can be accomplished:

ADMIN

This section allows you to manage system users and control their access level when they are added as a new user. Note that they can be excluding from establishing or modifying default and other settings established in My Profile or Admin as shown on the next page:

With a quick look at the Admin function, the tour of our online system has been completed. You may LogOut, or continue to click through the system to assess its capabilities.

Once you have completed your tour, **please Log Out.**

If you need more help with the system, or wish to establish an online account, please contact you local office.
